### ABOUT ME

As a newly graduated Junior System and Network Administrator in the field of Information Technologies, I want to support and improve the corporate IT infrastructure by putting my knowledge of basic network management, server maintenance and system security into practice. I aim to contribute to corporate goals with my fast learning skills, attention to detail and teamwork.

### EDUCATION

#### Baku Eurasian University

I have studied Translation (English) at the Faculty of Philology at the Bachelor's level from 2015 to 2019.

#### Course

#### Vision Academy

I have studied Sales Specialization at Vision Academy with the support of the State Employment Agency from February to April 2023. A certificate is available

#### Easy solutions technologies training center:

Certificate: Express course of network and system administrator.

Certificate: Express course of VoIP engineer

#### Experience

I served as a dedicated Sales Consultant at OMID MMC from May 1, 2023 to October 27, 2024, where I consistently strengthened client relationships, surpassed quarterly sales targets, and actively contributed to the company's market expansion and overall growth.

### LANGUAGES

- English: Pre-intermediate
- Azerbaijani: Native
- Russian: Beginner

### Skills

#### Networking & Infrastructure

Switching: Proficient in configuring and optimizing STP, VTP, HSRP, PVLAN, UDLD, DHCP Snooping, EtherChannel, MPLS, and IEEE 802.11 Wi-Fi protocols.

Routing: Skilled in IPv4/IPv6 static routing and dynamic routing protocols (RIP, EIGRP, OSPF, BGP), implementing Access Lists, and setting up DHCP Relay for efficient traffic management.

VPN & Security: Experience with IPsec, GRE, and GRE-over-IPsec tunnels for secure remote connectivity.

Network Automation: Capable of automating network device configurations using Python scripting to streamline management and reduce manual intervention.

#### Operating Systems & Server Administration

OS Installation & Maintenance: Installation, configuration, and administration of Windows Server 2016/2022 and CentOS environments.

System Upgrades & Support: Applying patches, performing system updates, and ensuring high availability and performance through proactive maintenance.

#### Microsoft Ecosystem

Active Directory: Creating and managing forests, user accounts, and permissions; configuring Group Policy Objects (GPOs); and integrating PCs into the domain for centralized management.

Microsoft 365 & Azure Integration: Configuring Office 365 Exchange Online, integrating on-premises Active Directory with Azure Entra ID, and establishing hybrid environments to seamlessly extend on-premises resources to the cloud.

#### Virtualization (VMware)

VMware Administration: Installation and administration of vCenter Server and ESXi hosts, including creating and managing virtual machines, distributed switches, snapshots, and backups.

Virtual Environments: Managing and optimizing VMware infrastructures through vCenter Server for scalability, reliability, and streamlined resource allocation.

#### FortiGate Firewalls

Integration with AD: Connecting FortiGate appliances to Active Directory via LDAP and FSSO for centralized user authentication and security policies.

Security & Monitoring: Configuring web filtering, speed limiting, and VPN services, as well as monitoring network activity to maintain a secure and compliant environment.

#### Asterisk (VoIP) on CentOS

PBX Configuration: Installing, configuring, and maintaining Asterisk servers on CentOS for enterprise telephony solutions.

Call Routing & Features: Working with sip.conf, extensions.conf, and features.conf to establish call routing, FXO/FXS trunk integration, SIP trunks, and advanced telephony features.

Communication Systems Management: Ensuring reliable office telephony operations, improving internal and external communication channels, and troubleshooting VoIP-related issues
